WORK EXPERIENCE

Senior Executive – Grant Thornton

08/2022 to Present

I specialize in implementing Robotic Process Automation (RPA) within the Audit domain. I drive digital transformation by leveraging tools like Power Automate, SharePoint Online, PandaDoc, and Automation Anywhere. My responsibilities span from guiding the organization in RPA exploration to executing end-to-end solutions, including Process Discoveries, Solutioning, Deployment, and Hypercare, ensuring streamlined and efficient audit processes.

Senior RPA Consultant – First Abu Dhabi Bank

01/2022 to 08/2022

Key responsibility involves RPA implementation for the banking domain. Experienced in creating Process ID cart, Business requirement document, Process design document and technical design document.

Best practices & standards are followed in alignment with our architecture patterns. Continuous contribution is made to the automation practices and frameworks to drive a culture of continuous improvement.

Implemented various RPA solutions involving Orchestrator APIs and applications like web, excel, outlook, SharePoint, PDF, OCR, Cognitive, word etc.

Senior RPA Developer – Etisalat

11/2019 to 01/2022

Key responsibility involves RPA implementation from the requirement understanding stage till the hyper care phase of the process using Agile methodology. Worked on UiPath database upgrade/maintenance-related activities using PL/SQL scripts and SQL queries.

Experience in installation/upgrade activity of UiPath products like Studio, Orchestrator, Process Mining, Insights and Action Center.

Experience in managing operation team & guiding vendor team for developing the RPA solutions while coordinating with business.

Associate – Cognizant Technology Solutions

01/2018 – 10/2019

I lead end-to-end RPA implementations for HR in Insurance, employing DevOps and Agile. I create essential documentation and drive initiatives to enhance existing solutions for improved ROI.

Senior Systems Engineer – Infosys LTD.

02/2015 – 01/2018

I implemented RPA for ad-hoc OBIEE report scheduling and automated the ELT process from source DB to Datamart. Utilized ETL tools such as ODI and Informatica for seamless data extraction, transformation, and loading between databases.

Software Developer – Windowmaker Software

04/2014 – 01/2015

Experienced in implementing solutions using C# .Net, stored procedures, functions, packages and database triggers using Oracle SQL Developer and PL/SQL to improve query performance.
